SEED GUIDE

GROW WITH CONFIDENCE

Meridian Seeds started in 2002 when 12 North Dakota farmers joined forces to find and share the best seeds available, without being tied to just one breeding program or limited by storage or capital constraints. Since then, our grower-owned company has expanded to meet the needs of farmers across the country – cultivating partnerships with elite breeders worldwide to bring you varieties backed by solid performance and proven yield potential.

You're in it for the long haul, and so are we. Choosing high-quality seeds you can trust is the most important decision you can make. We're here to earn your trust and help you succeed.

JOIN OUR DEALER NETWORK

We have openings for growers who would like to join our expanding network of seed producers and retailers. If you're dedicated to the best of the best in seeds, we'd love to hear from you.

YELLOW FIELD PEA SEED

Our wide selection of yellow pea varieties have the yield and protein balance that fits any market, coupled with the agronomic performance that growers have come to count on, year in and year out. Talk to your local Meridian Seeds associate about selecting the right variety for your farm.

KABULI CHICKPEA SEED

Meridian Seeds carries a blockbuster lineup of kabuli chickpea varieties with strong yields, desirable seed quality characteristics, and improved Ascochyta resistance. CDC Orion and CDC Frontier are known throughout the industry for their quality and yield. CDC Leader leads the way in Ascochyta resistance. CDC Palmer features the unprecedented combination of excellent yield and large seed size. Our newest variety, New Hope, features a bright white seed coat and enhanced resistance to Ascochyta blight. You already know our varieties, get to know Meridian Seeds. We're the chickpea experts.

KABULI CHICKPEA

CDC FRONTIER

MERIDIAN SEEDS EXCLUSIVE | PVP

A small kabuli that packs big yields – a new frontier in productivity! Features improved Ascochyta resistance.

CANOLA SEED

Meridian Seeds has canola hybrids that have what you want! Our CANTERRA SEEDS brand canola varieties feature the latest traits, stand-out disease packages, and most importantly, HIGH YIELD! Straight cut canola? We've got it. Clubroot and blackleg resistance? We've got it. Non-GMO hybrids for contracts? We've got that, too! Let your Meridian Seeds associate help you find the right canola hybrid for your farm.

MERIDIAN SEEDS IS PROUD TO PARTNER WITH CANTERRA SEEDS TO OFFER HIGH-PERFORMING CANOLA HYBRIDS WITH THE LATEST TRAIT PACKAGES AVAILABLE.

CANTERRA SEEDS was founded by nine Canadian seed growers and is a farmer-owned company to this day. They offer one of the broadest seed portfolios in Western Canada, cultivated through local investments in plant breeding, access to a global network of germplasm and traits, and a steadfast belief that farmers deserve the best. They have strategic partnerships around the world, and varieties tested locally across Western Canada.

These canola hybrids offer the traits you want and genetics you need. Look for these Yield Stamps to identify canola hybrids that provide extra protection to maximize your canola yield.

PodProtect™

Enhanced protection against pod shatter for superior straight cut performance.

Straight Cut

Suitable for delayed swathing or straight cutting, based on timing and harvest conditions.

Clubroot

Additional genes to protect against clubroot in high-risk zones.

Blackleg

Bred to have resistance to multiple races of blackleg.

OAT SEED

Your local Meridian Seeds associate can help you fill your hopper and feel your oats. CDC Endure is the latest in Meridian Seeds oat genetics, giving farmers the high yield they need, plus fantastic milling quality and excellent standability. Proven performer CS Camden is a miller-preferred variety that features excellent grain quality, high milling efficiency, and high beta glucan. CS Camden features superior grain yields across major oat growing regions and excellent standability.

COVER & FORAGE CROPS

COVER CROPS

Austrian Winter Pea	Sugar Beet	Sorghum Sudangrass	Sunny Hemp
Cowpea	Dwarf Essex Rape	White Proso Millet	Yellow Sweet Clover
Field Pea	Forage Chicory	Corn	Medium Red Clover
Forage Pea	Stockford Hay Barley	Safflower	
Lentil	Grain Sorghum	Oats	
Pasja Hybrid Brassica	Piper Sudangrass	Hairy Vetch	
Purple Top Turnip	Pearl Millet	Soybean	
Soil Buster Radish	Siberian Millet	Buckwheat	
Daikon Forage Radish	German Millet	Sunflower	

FORAGE CROPS

BERSEEM CLOVER

This annual clover is used throughout the Midwest in soil building mixtures because of its nitrogen producing characteristics. When planted early it can give more than one cutting and is a low bloat forage when used for grazing.

FORAGE BARLEY

Spring hooded barley with smooth or semi smooth awn surface. Harvest at soft dough.

BMR SWEETHING HYBRID SORGHUM SUDAN

The Brown Midrib gene reduces the lignin content in this hybrid, for increased fiber digestion in livestock. With nearly 20% increase in feed value.

SWEETHING, HYBRID SORGHUM SUDANGRASS

A fast growing highly palatable hybrid that produces a sweet, leafy, fine stemmed plant for high feed value.

BMR SWEETIE HYBRID FORAGE SORGHUM

A brown midrib sugar-sweet "cane type" forage that livestock relish.

GEM X, HYBRID PEARL MILLER

Gem X has a massive root system that enables it to stand up to heat and drought, particularly on light soils.

PEA-OAT MIX

This high quality, high yielding blend contains 60% peas and 40% oats.

PIPER SUDANGRASS

This annual forage is low in prussic acid content and has good drought and disease tolerance with good regrowth after pasturing.

WINTER TRITICALE

A cross between wheat and rye. It produces excellent forage, especially on marginal soils with nitrogen present.

TETRAPLOID ANNUAL RYEGRASS

Annual ryegrass that establishes easily and responds well to intensive grazing. It produces best under good fertility with adequate moisture. It stays green late into fall.

ITALIAN RYEGRASS, FORAGE TYPE

Due to its rapid establishment, quick regrowth and prolonged growth into fall, Italian ryegrass is an excellent forage. It does not go to seed the establishment year. Works well as a cover crop for establishing alfalfa.
